DETAILED ACTION

Drawings

1. Figure 9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. In addition to Replacement Sheets containing the corrected drawing figure(s), applicant is required to submit a marked-up copy of each Replacement Sheet including annotations indicating the changes made to the previous version. The marked-up copy must be clearly labeled as "Annotated Sheets" and must be presented in the amendment or remarks section that explains the change(s) to the drawings. See 37 CFR 1.121(d)(1). Failure to timely submit the proposed drawing and marked-up copy will result in the abandonment of the application.

Specification

3. The abstract of the disclosure is objected to because the numerals should be written in parenthesis. Correction is required. See MPEP § 608.01(b).

Claim Objections

4. Claim 14 is objected to because of the following informalities: in line 3, the letter "f" should be written in capital letter to be consistent with the terminology of formula (1). Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-16 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the prior art of record neither shows nor suggests a two-dimensional image display device comprising a polarization state modulator for modulating at least one of a polarization state and a phase of the coherent light emitted from the coherent light source; and a birefringent diffusion plate for spatially varying the phase of the coherent light emitted from the polarization state modulator.

Conclusion

7. This application is in condition for allowance except for the following formal matters:
- a. Figure 9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

b. The abstract of the disclosure is objected to because the numerals should be written in parenthesis. Correction is required. See MPEP § 608.01(b).

c. Claim 14 is objected to because of the following informalities: in line 3, the letter "f" should be written in capital letter to be consistent with the terminology of formula (1).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Troyer (US Patent Number 6,183,092) discloses a laser projection apparatus with liquid-crystal light valves and scanning reading beam.

Khoshnevisan et al. (US Patent Number 6,751,009) teach an acousto-micro optic device.

Sakata et al. (US Patent Number 6,945,652) show a projection display device having different wavelengths emitted from semiconductor lasers.

Kasazumi et al. (US Patent Number 7,271,962 B2) disclose a two-dimensional image formation apparatus.
